

```
#!/ python

# Program to find prime number between 2 and 100

for n in range(2, 100):
    for x in range(2, n):
        if n % x == 0:
            # It is a non-prime number
            break
    else:
        # loop fell through without finding a factor
        print n, 'is a prime number'
```
